## VIDEO PRODUCTION DIRECTORSHIP ADRIAN COLLEGE

### CERBERUS STUDIOS

Cerberus Studios, the Adrian College Film Studies Club, has been extremely busy during the Summer of 2025 and to begin the 2025-2026 academic year! To begin the year, students held elections for the group e-board positions, pitched and selected a short film project, and continued to contribute to the feature length documentary film project they began last semester - "Sov.er.ein.ty". In addition to working hard towards completing two large-scale film projects, the students have also made strides in marketing themselves through the creation of a website and instagram account (see below).

### SOV.ER.EIN.TY

sov·er·eign·ty is a feature length documentary on the topic of sovereign citizens living in the United States. The sovereign citizens movement is often difficult to understand. Not because of complexity but based on the followers rooted disorganization, contradictory membership, and isolated nature. This film will attempt to create clarity for those that may have misunderstood, been seeking more information about, or never before heard of the sovereign citizen movement.

### KIRK BALTZ VISIT

Kirk Baltz, from films such as: Dances with Wolves, Reservoir Dogs, and Natural Born Killers virtually visited campus from Hollywood on 9/11/25. Kirk spoke to the Film Studies students about his experience and answered many of the student's questions about the industry. We are very grateful for Mr. Baltz's time and look forward to hosting more professional speakers in the coming months!
